Culminating Project Planning SAMPLE (page 1 of 7)

Trimester: 3

Theme/Essential Question

What open-ended philosophical, moral, and intellectual question guides this trimester?
How do we liberate ourselves?

Culminating Project

- **Description:** Students will host a “Unity Festival” in the community under multiple disciplines and expressions. With an emphasis on inclusion of our community and with an understanding of the importance of coalition building, students will spearhead the effort to educate, entertain, and provide dialogical space for our communities through workshops, presentations, booths, and sporting events. We envision to invite all of our YCSC/C sister sites to join us in a day filled with food, music, games, and treats as we celebrate the success, growth, and development of our students and our community.
- **Projected Date:** 00/00/12

Culminating Project Theoretical Framework

- What theory/ rationale motivates this culminating project?
- The socio-cultural theory of education takes focus on the idea of a community of learners. Students learn to be proactive about their education, where the culture and community are entryways into education, not deterrents. In gaining agency in their own learning, they will find liberation in themselves. Also, a key component of differentiated instruction is creating a relevant focus for the students to see the value of what they are learning in their growth and the impact they can have in their community.

Core Skills/Understandings/ Connections

What the skills/ understandings/ connections from the trimester does the project promote?

Academic (HOTI)	Leadership (PSRI)	Social Justice (SRI)
<ul style="list-style-type: none"> • Small team participation • Creating, imagining, and innovating new ideas for serving community • Artistic expression in activities • Synthesizing information from multiple sources and use it effectively towards the success of the unity festival. 	<p>Organizing events. Can plan, organize and implement a program activity or event.</p> <p>Cultural competence. Demonstrates respect for cultural differences among peers and in the community. Understands and effectively communicates about terms of oppression (such as racism, sexism, adultism).</p>	<p>Interpersonal Analysis. Students will analyze how social collectives promote oppression.</p> <p>Action. Students will plan how to achieve collective social justice.</p>

Connection to Instruction

How will the site promote/ contribute towards the culminating project in the classroom(s)?

English	Math	Science	Social Studies	Electives
Students will join the rest of their peers, faculty, and staff, and participate in a festival that will celebrate their work and community. Here, the ambition is to host an event that invites the community in and allows the students to experience a form of liberation that comes from sharing and working for/with others on the same mission.	Students use their first APT and provide recipes from their bake goods to demonstrate how we use math in our daily lives. Baked goods will be supported at the Sweet's & Stuff tent. The recipes will be copied for others to see math in action.	In cooperation with the school-wide festival, this class will organize face painting art that advocates for environmental care and protection	Students will distribute merchandise/educational media that articulates their position on the social/political/economic impact of on a chosen landmark Supreme Court case(s) and defend their analysis of how engaging with the 3 branches of government can promote liberation.	Make an art piece that reflects the statement "Art is not a mirror held up to reality, but a hammer with which to shape it." Students will share their projects with a group of community members, demonstrating how their art can influence society.

Connection to Community Partner

How will the site work with their community partners to create a successful culminating project?

- The community partner will work with the site in supporting the funding and the overall logistics of implementation (location, reach into the community etc).

Setting Goals/ Action Plan

Key Components in Site Collaboration for Culminating Project

- Resources/ Supplies**
 - Compiling list of necessary supplies for each activity
 - Checking in with making sure that all supplies are assigned and are gathered in a timely manner.
 - Keeping track of expenses and receipts for reimbursements.

- Which staff member(s) will check-in on progress? (name[s])

- Student participation**
 - Organizing students into groups based on participation in festival.
 - Assigning specific tasks and collecting schedules for activities and accounting for overlap.

Which staff member(s) will check-in on progress? (name[s])

- Location/Time/Set up**
 - Will work with community partner in finding location with the necessary components and scheduling best time for the festival.

- Which staff member(s) will check-in on progress? (name[s])

- Promotion**
 - Organizing students to do outreach into the community to promote the event.
 - Reaching out to the sister YCSC/C sites to invite them to the event.
