Varicella						■	■			■	
Meningococcal											■
Pneumococcal			■	■	■	■	■				
Influenza					yearly						
Hepatitis A						■	■	■	■	■	■
Rotavirus			■	■	■						
HPV											■

This chart includes all of the current vaccinations recommended by experts. Each green bar represents a separate vaccine. When a box spans more than one timeframe, the vaccine may be given at any point during that time. However, talk to your child's PCP about the vaccinations your child needs because recommendations can change. Also, if your child is sick at one of the appointments, the vaccine should get delayed until the illness has passed.
